

Improving Delivery Flow

Make way for the value stream

A software product is a vehicle of value. It's that simple. However, it is challenging to deliver value in a steady, efficient flow. Adopting agile development principles is a good start. But is it enough to be competitive? After all, that is what all companies do? If your company is ready for the next step, we are here to help you stand out from the crowd and boost your delivery flow.

Competing in the market requires a high throughput of value. Bottlenecks impairing the throughput can emerge gradually and tend to be intertwined. Identifying and removing them can be challenging, regardless of how well you know your workplace.

Our Improving Delivery Flow service comprises an initial assessment of the flow of your overall software creation process, identifying obstacles and providing insight and necessary actions. From there, we are committed to following up on your progress, encouraging and assisting you on your improvement journey.

QUALITY CLEARS THE WAY

Imagine a high-quality product. Only a few bugs congest your delivery flow. Now, imagine high-quality requirements producing zero waste, user feedback generating good ideas, a working culture free of disruptive silos, and so on.

In summary, imagine leveraging quality to the broader spectrum, beyond the code. That is the purpose of the Improving Delivery Flow service, and that is why we consider a wide range of facets during our assessment.

OUR GUIDANCE

Our strength is our ability to assess both technical and human aspects of your software delivery cycle. In our experience, a strong value flow goes hand in hand with the flow as a state of mind.

Knowing that a combination of cultural shifts and innovation is necessary to eliminate obstacles, we help you embrace past failures and successes with courage and openness, enabling us to identify improvement areas together.

The principal input from the assessment comes from interviewing the stakeholders, i.e. your staff. The interviews contain open-ended questions transcending the stakeholder's role, honouring their sense of shared responsibility.

YOUR RESULT

Your commitment to follow through on the improvement areas carries the actual result of this assessment. The assessment itself does not. Realising this, we plan a follow-up workshop from the outset to induce a sense of focus and measure progress.

WHAT YOU GET

- ✓ An independent assessment that serves as a guide to your improvement journey.
- ✓ Organisational insights based on interviews promoting openness in the workplace.
- ✓ An in-depth analysis that reveals core issues that normally are difficult to identify.
- ✓ A list of commitments helping you to measure the progress and stay ahead of the competition.
- ✓ The ability to compare to the competition and show your strengths to potential customers.
- ✓ The possibility to shorten your lead times and deliver better value more frequently.
