

Quality and Environmental Policy

System Verification's vision is "Improving Digital Life" which means that we embrace digital opportunities and we want to contribute to ensuring that products and services do serve people in the best possible way. This assumes Quality Excellence. We take the same high-standard approach to the environment. We strive to minimize our negative impact in transportation, energy consumption and electronical devices and we support our customers to do the same.

System Verification shall constantly strive to improve employee and customer satisfaction by:

- helping our customers to reach their business and environmental goals by developing and realizing their digital strategy with focus on innovation, efficiency and security
- working with long-term perspective, commitment and proactivity by forming partnerships with our customers
- stimulating professional and personal development among coworkers
- adhering strictly to the processes and procedures in our Way of Working.

System Verification's Way of Working is based on our most critical success factors; satisfied customers, development and retention of highly competent colleagues and fulfillment of financial key indicators to satisfy the requirements of partners and owners.

Way of Working is updated yearly to ensure that we can continue to meet the needs of a demanding market and environmental legislation. All employees can access the Way of Working irrespective of time or location.

Erik Björhäll
